	<u>Extended Field Description</u>	<u>Forced Literal to PeopleSoft</u>		
Y	29 CRED_TUIT_OLD_RATE_UGRD_IN_ST TER-PC-TUITION-1 Per credit charge value 1	Mapped		<p>Please refer to the component TERM_FEE_PANEL which has the following tables: TERM_FE_CD_TBL; TERM_FEE_TBL; TERM_SF_CD_TBL; TERM_SF_FEE_TBL; TERM_FEE_RES. of establishing rates for tuition and fees. Each term fee code is made up of one or more term fee Fee Code definitions. Each term fee definition is made up of one or more term sub fee codes. And, each term sub fee code is made up of one or more term sub fees. This multilevel structure provides flexibility and convenience.</p> <p>By using different fee triggers and calculation methods at the lower levels, one term fee code can control how tuition is calculated for a wide range of unique student situations. Another term fee code can do the same for room and board combinations. Take the time to learn how term fee codes work and how you can use them to solve your most complex tuition calculation needs.</p> <p>Term Sub Fee Codes</p> <p>You can define one or more sub fee codes for a given term fee. Sub fee codes provide flexibility in how you show charges on an account, how you calculate charges, and how you print charges on a bill. For example, if your institution prefers to show just the bottom line charge for tuition and fees rather than the detail of these fees, you can use sub fees to define all the fees that comprise a tuition and fees charge and one charge appears on an account. If your institution prefers to show the detail of each charge that comprises tuition and fees, you can create individual term fees for each of these charges and break down tuition and fees into detail on an account.</p>
