RE: Recording Pathways Flexible and Required Core Values on Courses in CUNYfirst

At its meeting of June 27, 2011, Board of Trustees of The City University of New York approved a resolution establishing the Pathways to Degree Completion Initiative ("Pathways"). The initiative is designed to create a curricular structure that will streamline transfers and enhance the quality of general education across the University. Henceforth, colleges are required to record Pathways Flexible and Required Core designation on courses that have been approved by the Pathways review committees. The requirement designation value on courses in course catalog and schedule of classes has been identified as the University wide approach for implementing the Pathways to Degree Completion Flexible and Required Core Courses at all CUNY colleges. Please note the values for Pathways will incorporate the liberal arts indicator and definition of regular, compensatory and developmental, RLA, CLA, and DLA respectively. The values in CUNYfirst are:
